Professional Summary

Computer Science diploma student focused on cybersecurity, backend logic, and analytical problem solving. Strong understanding of Java, C++, low-level concepts, and security fundamentals. Experienced in collaborative project development, cybersecurity awareness systems, and real-world hackathon solutions with deep logical and critical thinking abilities.

Skills

Java, C++, C, JavaScript, HTML, CSS, Cybersecurity Fundamentals, DSA, Assembly Basics, Critical Thinking, Deep Logical Thinking, Problem Solving, Backend Logic, Frontend Development

Projects & Experience

Cyber Raksha v1 & v2

Security Awareness Platform

- Contributed to security-focused development and logical architecture of the platform.
- Worked on app, web, and PC application versions.
- Project received 1st Diamond Award at a state-level inter-polytechnic competition.

EatLo.food — Food Delivery Platform

Development Collaboration

- Collaborated on frontend and logical workflow improvements for the EatLo.food platform.
- Worked on practical problem-solving and feature planning concepts.

Pashu Raksha

Offline AI Livestock Disease Detection

- Collaborated on AI-powered livestock disease detection system for rural farmers.
- Worked on logic flow, feature planning, and offline functionality concepts.
- Project reached Top 16 among 800+ participating teams.

Achievements

- 1st Diamond Award — Cyber Raksha Project

- Top 16 — Sankalp Bharat 2026 National Hackathon
- Strong analytical, logical, and critical thinking abilities
- Worked on cybersecurity and AI-focused collaborative projects

Education

Diploma Engineering (Polytechnic), 2nd Year — Brahmanand Karanjekar Institute of Technology, Sakoli
